ARM Evaluation System

INSTRUCTION SHEET

IMPORTANT - Read this Instruction Sheet before unpacking the rest of the carton.

CONTENTS

The ARM Evaluation System is packaged in two cartons:

- Hardware plus System Software and function key card
- System Documentation

For contents of the Documentation package, see the instruction sheet therein. In addition to this instruction sheet the hardware package contains:

- ARM Second Processor
- DNFS ROM
- TWIN function key card
- System software - six discs, numbered 1 to 6
- Terms of Sale Agreement

Please contact Acorn Customer Services immediately if any of these are missing.

INSTRUCTIONS

The ARM system user guide in the documentation package contains full details regarding installation of both hardware and software. The relevant sections should be read before attempting to use the equipment. The ARM system user guide also contains information on actions to be carried out in case of difficulty.
