The Virus Protection Scheme

Your Acorn computer is supplied with a special anti-virus program that is loaded automatically whenever the computer is switched on.

The anti-virus program detects an attempt by any of the viruses known by the program to infect your computer.

If the program detects a virus you'll see a warning message telling you what the virus is and where it is hiding. The program also stops any further infection being spread.

This program gives a high degree of protection against currently known viruses; however new viruses cannot be detected and they are a potential threat to your programs and data.

This program is distributed by Acorn under licence from Pineapple Software and is therefore supplied 'as is' without warranty as to its fitness for any particular purpose.

The Virus Protection Scheme run by Pineapple Software provides a regular updating service for the virus protection program. It also supplies a virus removal application that will remove any viruses found on your discs or networks.

If you join the scheme, Pineapple Software will also provide ¡mmediate help if you think you have found a new virus which is not detected by the current version of the anti-virus program. Membership of the Scheme is optional and Acorn does not offer any warranty regarding the services provided to members.

If you would like to join the Virus Protection Scheme, please complete the form overleaf and return it to Pineapple Software.

I would like to join the Virus Protection Scheme ❐

I would like more information about the Virus
Protection Scheme ❐

I would like information about multi-user and area
licences ❐

I enclose Cheque/Credit card number/Official order
for a single user annual subscription to the Virus £
Protection Scheme. (£24.00 + VAT = £28.20)
